

SAFIUN, S.P., M.Si.

GIS SPECIALIST | SPATIAL DATA ANALYST | SURVEY & MAPPING | REMOTE SENSING

GIS and Spatial Data Professional with more than five years of experience delivering geospatial solutions for government institutions, universities, international research organizations, and land resource projects. Expert in spatial data collection, GIS analysis, remote sensing, survey & mapping, and environmental assessment. Proven ability to integrate satellite imagery, GPS observations, and field verification into accurate spatial information that supports decision-making in agriculture, mining, conservation, and regional planning.

 Bogor, Indonesia

CORE COMPETENCIES

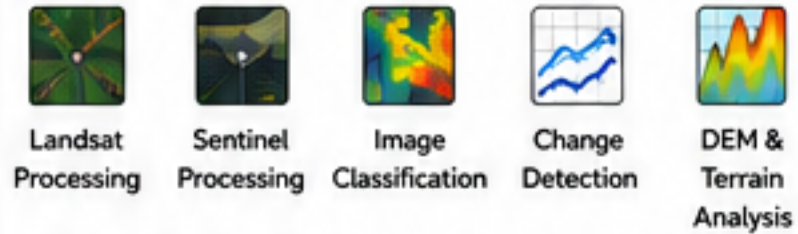

- Geographic Information Systems (GIS)
- Spatial Data Analysis
- Survey & Mapping
- Remote Sensing
- GPS Survey & Ground Verification
- Land Use & Land Cover Analysis
- Land Evaluation & Soil Survey
- Spatial Database Management
- Environmental Assessment
- Cartography & Thematic Mapping
- Spatial Statistics
- Technical Report Writing
- Research & Data Analysis
- Project Coordination & Collaboration

TECHNICAL SKILLS

GIS & GEOSPATIAL SOFTWARE

REMOTE SENSING

SURVEY & MAPPING

DATA ANALYSIS & OFFICE

EDUCATION

IPB University
Master of Science (M.Si.)
Land Resources Management
2023 – 2025

Relevant Areas:
GIS • Remote Sensing • Spatial Analysis
Land Use Change • Soil Resources
Environmental Planning

Halu Oleo University
Bachelor of Agriculture (S.P.)
Soil Science
2018 – 2022

LANGUAGES

Indonesian Native ●●●●●
English Professional Working Proficiency ●●●●●

PROFESSIONAL EXPERIENCE

- Event Assistant – Rare Indonesia** Mar 2025 – Present
Supported environmental conservation programs through stakeholder coordination, project implementation, documentation, and activity monitoring.
- Event Coordinator – OK OCE Kemanusiaan** Mar 2022 – Jul 2025
Coordinated community development projects from planning to evaluation. Managed project administration, documentation, and reporting.
- Field Technician – Alliance of Bioversity International & CIAT** Feb 2023 – Jul 2023
Conducted field surveys and collected geospatial & environmental data. Performed GPS-based data acquisition, data validation, and assisted in research reporting.
- Social Media Designer – Forum Wacana Pascasarjana IPB** Sep 2023 – Dec 2023
Designed visual content and communication materials to support academic outreach and organizational publications.
- Pejuang Muda – Ministry of Social Affairs, RI** Oct 2021 – Jan 2022
Conducted socio-economic surveys and community data collection to support evidence-based community empowerment programs.

MAJOR GIS & SURVEY PROJECTS

	Transmigration Area Survey & Mapping Ministry of Transmigration – Morowali Regency 2025	OUTPUT - Thematic Maps - Spatial Database - Survey Report	SOFTWARE ArcGIS, QGIS, GPS
	Data Desa Presisi (DDP) Mapping Project IPB University – North Kolaka Regency 2024	OUTPUT - Village Spatial Database - Thematic Maps - Data Integration	SOFTWARE ArcGIS, Excel, QGIS
	Cocoa Plantation Survey & Mapping Kolaka Regency 2023	OUTPUT - Plantation Maps - Spatial Database - Survey Report	SOFTWARE ArcGIS, QGIS, GPS
	Mining Land Acquisition Survey North Konawe Regency 2022	OUTPUT - Boundary Maps - Ownership Verification - Survey Report	SOFTWARE ArcGIS, GPS
	Idle Land Mapping Project Bombana Regency 2022	OUTPUT - Idle Land Map - Spatial Database	SOFTWARE ArcGIS, QGIS, GPS
	UAV Mapping for Mine Reclamation Area AHB Mining Site – Bombana Regency 2021	OUTPUT - Orthomosaic - Reclamation Maps - Survey Report	SOFTWARE Drone, ArcGIS
	Agricultural Land Evaluation Survey Buton Regency 2020	OUTPUT - Land Evaluation Maps - Land Suitability Maps - Survey Report	SOFTWARE ArcGIS, Excel
	Basic Land Survey Training (SCA XVI) Dept. of Soil Science, Halu Oleo University 2019	OUTPUT - Field Maps - Survey Report	SOFTWARE GPS, Compass

Completed more than 10 GIS and field survey projects across Sulawesi and Sumatra in agriculture, mining, conservation, and regional planning.

Collaborated with government institutions, universities, international research organizations, and non-profit organizations.

Applied GIS and spatial analysis to deliver accurate information that supports decision-making and sustainable land management.
